INTRODUCTION

Dear Reader,

The Federal Bureau of Investigation's (FBI) Internet Crime Complaint Center (IC3) is a central intake point for victims to report fraud. IC3 shares the complaints it receives with FBI field offices and other law enforcement and regulatory agencies for further investigation or action, as appropriate. Along with the Department of Justice's Elder Fraud Initiative and other partners, the FBI is continually dedicated to identifying the perpetrators of these schemes and bringing them to justice.

Every day, the IC3 receives thousands of complaints reporting a wide variety of schemes, many of them targeting seniors. These complaints are analyzed and aggregated to identify trends and help develop strategies to combat these schemes and protect potential victims from loss.

In 2022, total losses reported to the IC3 by elderly victims increased 84% from 2021. Tech and Customer Support schemes continued to be the most common type of fraud reported, with 17,800 complaints filed by victims over 60. Monetary losses due to Investment Fraud reported by victims over 60 increased over 300%, more than any other kind of fraud, largely due to the rising trend of crypto-investment scams. In almost every crime type tracked by the IC3, losses involving cryptocurrency increased. Overall, cryptocurrency-related losses reported by the elderly increased by 350%.

As in previous years, the FBI is publishing the 2022 IC3 Elder Fraud Annual Report in hopes of bringing awareness to this problem and preventing future victimization. I encourage you to share the information from this report with your friends and families and take the opportunity to talk about these scams.

We also encourage the public to report any internet-related fraud, even attempted fraud, to the IC3 as soon as possible. Providing detailed information, including complete summaries and financial transactions, assists the FBI with investigating and disrupting the frauds that are devastating our citizens.

M. Quesada

Assistant Director Federal Bureau of Investigation Criminal Investigative Division

BY THE NUMBERS

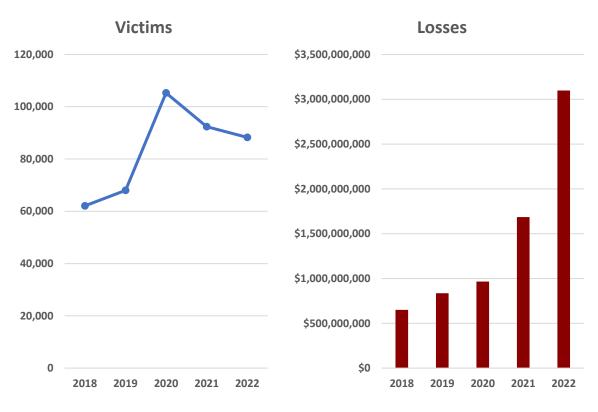

¹ Accessibility description: Image depicts key statistics regarding victims over 60 complaints. The total number of complaints received in 2022 was 88,262. Total losses of \$3.1 billion were reported. Victims over 60 experienced 84 percent increase in losses from 2021. The average loss per victim was \$35,101. 5,456 victims lost more than \$100,000.

2022 VICTIMS BY AGE GROUP

	VICTIMS	
Age Range ²	Total Count	Total Loss
Under 20	15,782	\$210,482,785
20 - 29	57,978	\$383,137,848
30 - 39	94,506	\$1,277,981,506
40 - 49	87,526	\$1,551,296,778
50 - 59	64,551	\$1,830,440,552
Over 60	88,262	\$3,098,100,121

VICTIMS OVER 60 REPORTING FOR PAST FIVE YEARS³

² Not all complaints include an associated age range—those without this information are excluded from this table. Please see Appendix B for more information regarding IC3 data.

³ Charts describe Counts and Losses for Victims over 60 from 2018 – 2022.

crime type has been selected. Please see Appendix B for

more information regarding IC3 data.

** Regarding Ransomware adjusted losses, this number does not include estimates of lost business, time, wages, files, equipment, or any third-party remediation services acquired by a victim. In some cases, victims do not report any loss amount to the FBI, thereby creating an artificially low overall ransomware loss rate. Lastly, the number only represents what victims report to the FBI via the IC3 and does not account for victims directly reporting to FBI field offices/agents.

COMMON FRAUDS AFFECTING VICTIMS OVER 60

Call Center Fraud: Tech and Customer Support / Government Impersonation

Illegal call centers defraud thousands of victims each year. Two categories of fraud reported to the IC3, Tech/Customer Support and Government Impersonation, are responsible for over \$1 billion in losses to victims.

Call centers overwhelmingly target the elderly, with devastating effects. Almost half the victims report to be over 60 (46%), and experience 69% of the losses (over \$724 million). Victims over 60 lost more to these scams than all other age groups

combined, and reportedly remortgaged/foreclosed homes, emptied retirement accounts, and borrowed from family and friends to cover losses in these scams. Almost 100 elderly victims reportedly

lost over \$1 million to these scams, while the majority lost between \$1,000 \$10,000.

	Victims	<u>Losses</u>	<u>Trend</u>
Government Impersonation	3,425	\$136,500,338	4 97%
Tech and Customer Support	<u>17,810</u>	<u>\$587,831,698</u>	▲ 147%
TOTAL	21,235	\$724,332,036	

While the number of victims and losses from Government Impersonation scams are significantly lower, the fraud tends to occur over a longer period as it takes the victim longer to realize they are caught in a scam. Tech and Customer Support scammers take advantage of victims' unfamiliarity with technology, online banking, and newer payment methods, like cryptocurrency, to quickly take as much money as possible. It is not uncommon for the scammers to execute a combination of the two scams or re-victimize a previous victim with the other form of scam.

The scams primarily emanate from call centers in South Asia, mainly India. In response to the increasing victimization, the Department of Justice (DOJ) and the FBI are collaborating with law enforcement in India, such as the Central Bureau of Investigation in New Delhi and local Indian states, to combat cyber-enabled financial crimes and transnational call center fraud. This cooperation has secured the testimony of U.S. victims of call center fraud for use in enforcement proceedings against the alleged perpetrators.

In 2022, with the assistance of U.S. law enforcement, Indian law enforcement accomplished multiple call center raids, disruptions, seizures, and arrests of the individuals alleged to be involved in perpetrating these cyber-enabled financial crimes and global telemarketing frauds.

To learn more about these types of scams, please see these 2022-published Public Service Announcements

on the IC3 website and recently published podcast on FBI.gov⁴

⁴ See Appendix D: Referenced Publications

Investment

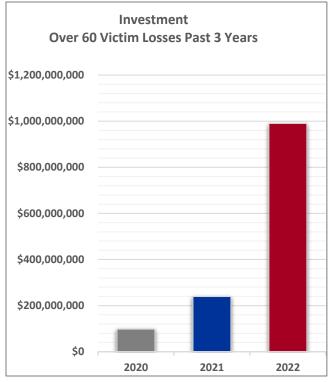

Investment fraud involves complex financial crimes often characterized as low-risk investments with guaranteed returns. They comprise of advanced fee frauds, Ponzi schemes, pyramid schemes, market manipulation fraud, real estate investing, and

trust-based investing such as pig butchering.

Trust-based Investment scams represent the biggest portion of losses for investment in 2022. These scams often target individuals online and most commonly involve a form of cryptocurrency. The scammers aim to gain the victim's trust and offer an opportunity to invest in a low-risk, and unusually high-yield type of scam. Victims over 60 are pressured into accessing their retirement accounts, the equity of their home, or even convinced to go into debt to invest as much money as possible into the fraudulent scheme. This can be devastating to elderly victims as their income is typically limited and many lose their entire life savings. ⁵

More than 4,500 victims over 60 reported losses slightly under \$1 billion.

Lottery/Sweepstakes/Inheritance

In 2022, the IC3 received over 2,300 reports of elderly victims in Lottery/Sweepstakes/Inheritance scams. Victims lost almost \$70 million to these types of fraud.

The initial contact in a Lottery/Sweepstakes scam is often a call, an email, a social media notification, or a piece of mail offering congratulations for winning a big

contest, lottery, or sweepstakes the victim did not enter. To claim their prize, the victim is required to pay upfront fees and taxes. The subjects will continue to call victims for months or even years, promising the big prize is only one more payment away.

Inheritance scams function very similarly as the victim is informed an unknown, distant relative has left a large inheritance to the victim. The victim is required to pay taxes and fees to receive the inheritance money.

⁵ See Appendix D: Referenced Publications

Confidence/Romance Scams

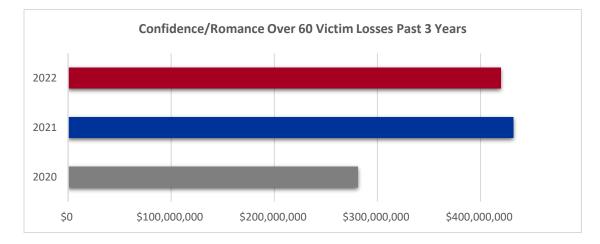

Confidence/Romance scams encompass those designed to pull on a victim's "heartstrings". In 2022, the IC3 received reports from 7,166 victims over 60 who experienced almost \$419 million in losses to Confidence/Romance scams.

Romance scams occur when a criminal adopts a fake online identity to gain a victim's affection and confidence. The scammer uses the illusion of a romantic or close

relationship to manipulate and/or steal from the victim. The criminals who carry out Romance scams are experts at what they do and will seem genuine, caring, and believable. The scammer's intention is to quickly establish a relationship, endear themselves to the victim, gain trust, and eventually ask for money. Scam artists often say they are in the military, or a trades-based industry engaged in projects outside the U.S. That makes it easier to avoid meeting in person—and more plausible when they request money be sent overseas for a medical emergency or unexpected legal fee.

Grandparent Scams also fall into this category, where criminals impersonate a panicked loved one, usually a grandchild, nephew, or niece of an elderly person. The loved one claims to be in trouble and needs money immediately. In 2022, almost 400 victims over 60 reported Grandparent scams, with approximate losses of \$3.8 million.

Extortion

Extortion occurs when a criminal demands something of value from a victim by threatening physical or financial harm or the release of sensitive data. Extortion is used in various schemes reported to the IC3, including email extortion attacks, hitman schemes, government extortion, and sextortion. In 2022, over 4,200 victims over 60 reported incidences of extortion, with losses over \$15.5 million.

Almost half of extortion victims over 60 reported to be victims of sextortion. Most believed they were in a relationship with the victim and shared sensitive photos or information which were then later used to sextort them.

Non-Payment/Non-Delivery

Elderly victims filed almost 8,000 Non-Payment/Non-Delivery complaints experiencing losses over \$51 million in 2022, making Non-Delivery of products the second most reported fraud among the elderly.

More elderly people are joining social media outlets to connect with others. The combination of online shopping and social media creates easy venues for scammers to post false advertisements. Many victims report ordering items from links

advertised on social media and either receiving nothing at all or receiving something completely unlike the advertised item.

Cryptocurrency

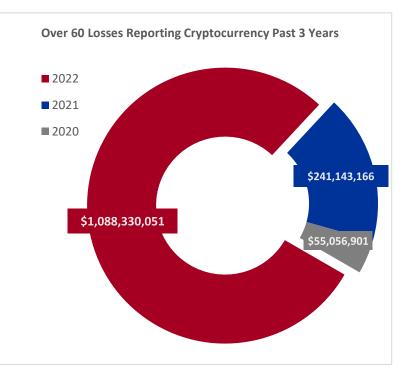

In 2022, the IC3 received almost 10,000 complaints from victims over 60 involving the use of some type of cryptocurrency, such as Bitcoin, Ethereum, Litecoin, or Ripple. Losses of these victims totaled over \$1 billion.

Cryptocurrency is becoming a preferred payment method for all types of scams – SIM Swaps, Tech/Customer Support fraud, Employment schemes, Romance scams, and even some Auction fraud. It is extremely pervasive in Investment scams, where

losses can reach into the hundreds of thousands of dollars per victim.

The largest losses among victims over 60 are cryptocurrency-related Investment scams, which accounts for approximately 66% of all losses related to cryptocurrency for this age group. Call Center fraud, such as Tech and Customer Support scams and Government Impersonation, are second with approximately 15% of losses associated to cryptocurrency.

The IC3 published multiple PSAs depicting how cryptocurrency is exploited in frauds and scams, particularly the use of cryptocurrency

ATMs, crypto investments, and crypto support impersonations.⁶

APPENDIX A: DEFINITIONS

Advanced Fee: An individual pays money to someone in anticipation of receiving something of greater value in return, but instead, receives significantly less than expected or nothing.

Business Email Compromise (BEC): BEC is a scam targeting businesses or individuals working with suppliers and/or businesses regularly performing wire transfer payments. These sophisticated scams are carried out by fraudsters by compromising email accounts and other forms of communication such as phone numbers and virtual meeting applications, through social engineering or computer intrusion techniques to conduct unauthorized transfer of funds.

Botnet: A botnet is a group of two or more computers controlled and updated remotely for an illegal purchase such as a Distributed Denial of Service or Telephony Denial of Service attack or other nefarious activity.

Confidence/Romance Fraud: An individual believes they are in a relationship (family, friendly, or romantic) and are tricked into sending money, personal and financial information, or items of value to the perpetrator or to launder money or items to assist the perpetrator. This includes the Grandparent's Scheme and any scheme in which the perpetrator preys on the complainant's "heartstrings."

Credit Card Fraud/Check Fraud: Credit card fraud is a wide-ranging term for theft and fraud committed using a credit card or any similar payment mechanism (ACH, EFT, recurring charge, etc.) as a fraudulent source of funds in a transaction.

Crimes Against Children: Anything related to the exploitation of children, including child abuse.

Data Breach: A data breach in the cyber context is the use of a computer intrusion to acquire confidential or secured information. This does not include computer intrusions targeting personally owned computers, systems, devices, or personal accounts such as social media or financial accounts.

Employment: An individual believes they are legitimately employed and loses money, or launders money/items during the course of their employment.

Extortion: Unlawful extraction of money or property through intimidation or undue exercise of authority. It may include threats of physical harm, criminal prosecution, or public exposure.

Government Impersonation: A government official is impersonated in an attempt to collect money.

Harassment/Stalking: Repeated words, conduct, or action that serve no legitimate purpose and are directed at a specific person to annoy, alarm, or distress that person. Engaging in a course of conduct directed at a specific person that would cause a reasonable person to fear for his/her safety or the safety of others or suffer substantial emotional distress.

Identity Theft: Someone steals and uses personal identifying information, like a name or Social Security number, without permission to commit fraud or other crimes and/or (account takeover) a fraudster obtains account information to perpetrate fraud on existing accounts.

Investment: Deceptive practice that induces investors to make purchases based on false information. These scams usually offer the victims large returns with minimal risk. (Retirement, 401K, Ponzi, Pyramid, etc.).

IPR/Copyright and Counterfeit: The illegal theft and use of others' ideas, inventions, and creative expressions – what's called intellectual property – everything from trade secrets and proprietary products and parts to movies, music, and software.

Lottery/Sweepstakes/Inheritance: An Individual is contacted about winning a lottery or sweepstakes they never entered, or to collect on an inheritance from an unknown relative.

Malware: Software or code intended to damage, disable, or capable of copying itself onto a computer and/or computer systems to have a detrimental effect or destroy data.

Non-Payment/Non-Delivery: Goods or services are shipped, and payment is never rendered (non-payment). Payment is sent, and goods or services are never received, or are of lesser quality (non-delivery).

Overpayment: An individual is sent a payment/commission and is instructed to keep a portion of the payment and send the remainder to another individual or business.

Personal Data Breach: A leak/spill of personal data which is released from a secure location to an untrusted environment. Also, a security incident in which an individual's sensitive, protected, or confidential data is copied, transmitted, viewed, stolen, or used by an unauthorized individual.

Phishing: The use of unsolicited email, text messages, and telephone calls purportedly from a legitimate company requesting personal, financial, and/or login credentials.

Ransomware: A type of malicious software designed to block access to a computer system until money is paid.

Real Estate: Loss of funds from a real estate investment or fraud involving rental or timeshare property.

SIM Swap: The use of unsophisticated social engineering techniques against mobile service providers to transfer a victim's phone service to a mobile device in the criminal's possession.

Spoofing: Contact information (phone number, email, and website) is deliberately falsified to mislead and appear to be from a legitimate source. For example, spoofed phone numbers making mass robocalls; spoofed emails sending mass spam; or, forged websites used to mislead and gather personal information. Often used in connection with other crime types.

Tech Support: Subject posing as technical or customer support/service.

Threats of Violence: An expression of an intention to inflict pain, injury, self-harm, or death not in the context of extortion.

APPENDIX B: ADDITIONAL INFORMATION ABOUT IC3 DATA

- Each complaint is reviewed by an IC3 analyst. The analyst categorizes the complaint according to the crime type(s) that are appropriate. Additionally, the analyst will adjust the loss amount if the complaint data does not support the loss amount reported.
- One complaint may have multiple crime types.
- Some complainants may have filed more than once, creating a possible duplicate complaint.
- All location-based reports are generated from information entered when known/provided by the complainant.
- Losses reported in foreign currencies are converted to U.S. dollars when possible.
- Complaint counts represent the number of individual complaints received from each state and do not represent the number of individuals filing a complaint.
- Victim is identified as the individual filing a complaint.
- Subject is identified as the individual perpetrating the scam as reported by the victim.
- "Count by Subject per state" is the number of subjects per state, as reported by victims.
- "Subject earnings per Destination State" is the amount swindled by the subject, as reported by the victim, per state.

APPENDIX C: TIPS FOR PROTECTION

- Recognize scam attempts and end all communication with the perpetrator.
- Search online for the contact information (name, email, phone number, addresses) and the proposed offer. Other people have likely posted information online about individuals and businesses trying to run scams.
- Resist the pressure to act quickly. Scammers create a sense of urgency to produce fear and lure victims into immediate action. Call the police immediately if you feel there is a danger to yourself or a loved one.
- Be cautious of unsolicited phone calls, mailings, and door-to-door service offers.
- Never give or send any personally identifiable information, money, jewelry, gift cards, checks, or wire information to unverified people or businesses.
- Make sure all computer anti-virus and security software and malware protections are up to date. Use reputable anti-virus software and firewalls.
- Disconnect from the internet and shut down your device if you see a pop-up message or locked screen. Pop-ups are regularly used by perpetrators to spread malicious software. Enable pop-up blockers to avoid accidentally clicking on a pop-up.
- Legitimate customer, security, or tech support companies will not initiate unsolicited contact with individuals; nor, demand immediate payment or require payment via prepaid cards, wire transfers, cryptocurrency, or mailed cash.
- Never give unknown, unverified persons remote access to devices or accounts.
- Be careful what you download. Never open an email attachment from someone you do not know and be wary of email attachments forwarded to you.
- Take precautions to protect your identity if a criminal gains access to your device or account. Immediately contact your financial institutions to place protections on your accounts and monitor your accounts and personal information for suspicious activity.
- Legitimate lotteries and beneficiaries do not need to pay upfront taxes and fees to claim a prize or inheritance. Playing foreign lotteries in any form is a violation of federal law.
- Be careful what you post and make public online. Scammers can use details shared on social media and dating sites to better understand and target you.
- Government or law enforcement officials will not demand payment by cryptocurrency, prepaid cards, wire transfers, or overnight mailed cash, nor contact a subject by phone to notify they are under investigation.
